Online questionnaire guide

These 32 questions help us understand your activity, bottlenecks and priorities. Complete the relevant fields and send your answers to our team.

Why complete it

The questionnaire helps us prepare a relevant demonstration and a pilot project with clear objectives.

How to complete it

1. Use a representative month as your reference. 2. Enter the information you know. 3. Describe your main priority. 4. Send the questionnaire and download a copy if you wish.

Your name, email and agreement are required to send the form. Answer the questions that apply to your activity.

Questionnaire answers stay in the open page. You can change the language without losing them. Reloading or closing the page clears them; download a copy first.

Important distinctions

02: Actual working time for one person, excluding waiting time. 25: Answer for the result delivered in your activity. Total elapsed time, including waiting; question 02 asks only about actual working time.

17: EUR / month, for subscriptions and recurring services that automate your work. 18: EUR, one-off: configuration, data import, integrations and training, as needed. Separate from the monthly budget in question 17.

23: Use the notes field to add details or describe other types of customers.

How answers are used

Your questionnaire is sent to comenzi@dataerpflow.ro. Our team receives your answers in Romanian; free-text answers are also retained in their original language. You receive an email confirmation.

I agree to the use of my details and answers to review my request and contact me. Free-text answers in English, French or Russian are automatically translated into Romanian using DeepL. I will not include sensitive data or passwords.

From assessment to demonstration

We identify whether the need concerns COS, CIS or dataERP. We choose a pilot project, the required data and a verifiable result. Financial estimates are developed later using agreed figures and assumptions; completing the questionnaire does not guarantee savings.
